Fundamentals of Creating and Implementing Dashboards with Google Data Studio Training Workshop on December 2, 9, and 16, 2022 via ZOOM (22 Training Hours)

Did you know that the purposes of data dashboards are to monitor and judge a business or organizational performance in real time? According to databox.com, there are ten common mistakes in creating and implementing data dashboards: lack of context, too many colors, too busy design, lack of focus, poor data visualization pairing, insufficiently labeled data, and no mobile friendliness. A good data dashboard must communicate the things that matter, such as KPIs and other significant metrics, to an organization.

Dashboards present a comprehensive overview of the company or organization's performance and do so through the use of data visualization tools like charts and graphs.

Google Data Studio is free software and cloud-based technology that helps organizations create and implement dashboards. Suppose you want to be an expert in dashboard creation. In that case, all you need is a good understanding of your users (fusioncharts.com), you do not need to be a data analytics expert, or you do need programming skills to create and implement dashboards across your organization. Further, all you need to ask (as a creator and implementer of the dashboard) are (what is the) purpose of the dashboard, the information that users need to see (or must be displayed), and the pain points of the users.

We invite you to learn how to create and implement a dashboard(in your organization) on December 2, 9, and 16, 2022, via ZOOM. The workshop is titled Fundamentals of Creating and Implementing Dashboards with Google Data Studio. Registration is PHP3100.00, inclusive of 12% VAT, digital handouts.

The Strategic One Business Management Consultancy Firm **currently holds a net promoter score of 62%**. The net promoter score estimates how many customers will likely recommend your business. The NPS score (according to Retently.com) of Netflix is 68, Starbucks is 77, Amazon has 62, Airbnb has 74, and Tesla with 96. Our customer satisfaction score is **8.9/10**. We have trained 2844 across the country. We only promote freeware and open-source software(s) in our workshops. There is a great need for us Filipinos to be resourceful.

Note: To access the course outline, description, and program of activities, send us an email.

The registration fee of **PHP3100.00 includes 12% VAT**, digital handouts, datasets, installer of the software, digital certificates (of participation, completion, and attendance), recording of the webinar, and the learning experience. OFFICIAL RECEIPTS will be provided upon payment. STRATONE is now a VAT company.

START One has been operating for a year now, catering to the market research and training requirements of BPOs, various government agencies, and academic institutions here in the country. The STRAT One (Strategic One Business Management Consultancy Firm) is an

emerging business that provides world-class webinars, training, seminar, and conferences at an affordable price for the market. We believe that learning management, marketing, business strategy, data science, and research should be reasonable (the Philippines) to emerge as a leading business destination in the ASEAN. Moreover, STRAT One aims to democratize analytics here in the Philippines.
